Smart Campus Event Management System

SDG: 9 – Industry, Innovation and Infrastructure

Presented By:

CH.Lavanya – VTU26565 – 23UECS0120

Courses Handling Faculty:

Dr. Hafizur Rahman,

Assistant Professor

INTRODUCTION

1

- Traditional campus event management is mostly manual and inefficient.
- It leads to difficulties in registration, tracking, and communication.
- This project aims to provide a centralized digital solution.
- It simplifies event browsing, registration, and management.
- The system improves student participation and engagement.
- It ensures secure access and accurate data handling.
- The application uses modern web technologies for better performance.
- Overall, it provides an efficient and user-friendly event management platform.

PROBLEM STATEMENT

1

2

- Existing campus event management systems rely heavily on manual processes.
- This leads to inefficiency in handling registrations and event coordination.
- There is no centralized platform to manage all events effectively.
- Tracking participant details and event data becomes difficult.
- Manual systems increase the chances of errors and data loss.
- Communication between students and organizers is often limited.
- There is a need for a secure and automated system.
- The proposed solution aims to improve efficiency, accuracy, and accessibility.

OBJECTIVE(S)

1

2

3

4

5

6

7

8

9

Key Objectives:

- To develop a web-based system for efficient campus event management
- To enable easy event registration and secure user authentication
- To provide automated ticket generation and admin analytics

PROPOSED SYSTEM

1

2

3

4

5

6

7

8

9

- The system is a web-based platform for managing campus events
- Provides a centralized solution for students and administrators
- Allows users to browse, select, and register for events online
- Ensures secure login and user authentication
- Automates event registration and data storage
- Generates PDF tickets after successful booking
- Provides admin dashboard with charts and analytics
- Improves efficiency, reduces errors, and enhances user experience

PROPOSED SYSTEM ARCHITECTURE

Fig-1 :Proposed System Architecture

➤ **Input**

- User login and registration details
- Event search and selection inputs
- Admin inputs for event creation and updates

➤ **Processing**

- Requests handled by **Spring MVC Controllers**
- Business logic executed in **Service Layer**
- Data validation and request handling performed
- Secure authentication using **Spring Security**

➤ **Database**

- MySQL database used for data storage
- Stores **users, events, registrations, and tickets**
- Managed using **Spring Data JPA (CRUD operations)**

➤ **Output**

- Displays event details and registration status
- Generates **PDF tickets after booking**
- Shows admin dashboard with **charts and analytics**

WORKFLOW

Fig-2 : Work Flow

TECHNOLOGIES USED

1

❖ **Frontend:** HTML, CSS, Java Script

2

❖ **Backend:** Spring Boot, Java

3

❖ **Database:** H2

4

❖ **Tools:** VSCODE, Google Chrome

5

Hardware/Software Requirements:

6

- Processor: Intel i3 or above
- RAM: Minimum 4GB
- OS: Windows/Linux
- Browser: Chrome/Edge

7

8

9

MODULE DESCRIPTION

Module 1: User Authentication

This module handles the registration and login functionality of users. It allows new users to create an account and existing users to log in securely using their credentials. The system uses authentication mechanisms to ensure data security and restrict unauthorized access. It also manages user sessions after successful login.

Module 2: Event Management

This module is responsible for managing all event-related activities. The administrator can add, update, and delete event details such as title, date, location, and description. Users can view the list of available events and select events based on their interests.

Module 3: Registration and Ticket Generation

This module enables users to register for selected events by entering their personal details. Once the registration is completed successfully, the system displays a confirmation or payment success page. It also generates a PDF ticket containing event and user information.

Module 4: Admin Dashboard

This module provides an interface for administrators to monitor and control the system. It displays event statistics and user participation using charts and reports. The admin can analyze data and manage the overall functioning of the system efficiently.

IMPLEMENTATION SCREENSHOTS

Figure 8-1: Home Page

- 1

- 5
- 6
- 7
- 8
- 9

The home page of the Smart Campus Event Management System provides a visually appealing interface for users to navigate the application. It allows users to explore events, register easily, and access different features through a clean navigation bar. The design uses a modern vintage theme to enhance user experience and engagement.

IMPLEMENTATION SCREENSHOTS

The login page provides a secure interface for users to access the system .It allows users to enter their credentials and ensures authentication before granting access. The clean design and highlighted login form improve usability and user experience.

IMPLEMENTATION SCREENSHOTS

The events page displays a list of upcoming campus events in an organized and visually appealing format. Users can browse events, apply filters, and select an event to register. It provides an easy way to explore and participate in various campus activities.

ADVANTAGES & LIMITATIONS

ADVANTAGES:

- 1
 - 2
 - 3
 - 4
 - 5
 - 6
 - 7
 - 8
 - 9
- Provides a user-friendly and attractive interface
 - Reduces manual effort through automation
 - Ensures secure authentication and data handling
 - Enables easy online event registration
 - Generates PDF tickets automatically
 - Offers real-time data tracking and analytics
 - Supports centralized data management
 - Improves accuracy and reduces errors

Limitations :

- Requires internet connectivity to access the system
- Payment process is currently simulated (not real gateway)
- Limited to web platform (no mobile app yet)
- Depends on server and database availability
- No real-time notifications (SMS/Email) implemented

Thank you
